Website Testing

In this section, I will be testing the website across multiple environments to discover the following 3 things:

1. If the website is functional
2. If the website is compatible
3. If the website is usable.

Functional

I will be using 2 different web rendering engines in 2 web browsers: Chromium (via Brave) and Gecko (via Firefox). Testing functionality means making sure that the website loads properly, that all JavaScript works properly, etc.

Compatible

To be testing compatibility, I'll be using the same 3 browsers listed above. Using these 3 different browsers and manually testing a set list of features allows me to see discrepancies in how these browsers handle rendering certain things.

Usable

Ensure that the website in its current form is usable. This will also allow testing to make sure that these websites are usable in mobile, tablet and desktop resolutions by using each browser's devtools.

Test	Expected Results	Browser & Engine	Screenshot(s)	Meets Expectations?
1	Pressing the “subscribe to newsletter” button displays a modal to subscribe to the Venue Cymru newsletter. And properly scales on mobile.	Brave (Chromium)	 	

		Firefox (Gecko)	 	Yes

1.1	Entering an invalid email address results in an error popup.	Engine Agnostic	 	

1.2	Entering a correct email address results in a success popup and the subscribe to newsletter modal closes.	Engine agnostic	 	Yes

2.1	Clicking on “Home” in the navbar brings the user to the homepage. And properly scales on mobile.	Engine Agnostic		Yes

2.2	Clicking on “About” in the navbar brings the user to the about page. And properly scales on mobile.	Engine Agnostic	 	Yes

2.3	Clicking on “What’s On” in the navbar brings the user to a page telling the user of upcoming shows, performances, etc. And properly scales on mobile.	Engine Agnostic	 	Yes

2.4	Clicking on “What’s Available” in the navbar brings the user to the page telling the user what is available at Venue Cymru (such as accessibility-related features). And properly scales on mobile.	Engine Agnostic		Yes
3	When clicking on “Read More” to any “Everybody's Talking About Jamie” advertisement, it takes you to the Everybody's Talking About Jamie information page. And properly scales on mobile.	Engine Agnostic		Yes

4	Clicking on social media links in the footer leads to the correct Venue Cymru social media websites.	Engine Agnostic		Yes
